Moonen 84 (Moonen's most successful series) and the custom Moonen 96 Clementine (launched 2005).

Darsea, with steel hull and aluminium superstructure, is shaped by René van der Velden Yacht Design over a seakindly round-bilge hull by Diana Yacht Design. She has contemporary styling by Art-Line Interiors that features leather, bamboo, wenge, woven suede, and original hand-crafted art, all set against a backdrop fine cherry panelling and furniture. Beyond the pleasurable interior, equal emphasis was placed in Darsea on enjoyment of outdoor living. Darsea, the first of a new series of Moonen 97 Displacement yachts, is equipped with twin Caterpillar engines, Naiad zero-speed stabilizers, Cramm bow thruster, and is built to Lloyd's Register Class and MCA Certification. According to the awards creators, Boat International Media: "World Superyacht Awards are designed to recognise the talents of the naval architects, designers, builders and ultimately, the visions of the owners who bring together the teams that work to create these masterpieces of modern design and manufacture." The World Superyacht Awards will be presented in London's historic Guildhall on 16 May 2009.
