130' DIANA DESIGN MOTOR YACHT

Built in 1988 by Amels of Holland this aluminium hull and superstructure yacht is a superb example of Dutch craftsmanship.

Two owner's suites (one on the main deck) plus two large double cabins allows accommodations for eight plus good crew cabins with captain's cabin on upper deck.

Powered with twin MTU 1960 hp diesels which allows a cruising speed of 15 knots and a maximum 17

knots. 3000 + nautical mile range. Twin 90 kw Mercedes Benz generator plus 40 kw night generator. Over \$350,000 spent on navigational and radar equipment.

This is a fine example of a classic combination of an outstanding designer and builder creating a world cruising yacht finished throughout to the highest standards.

Priced very reasonably.
