DIANA YACHT DESIGN

■ Building at Aarhus Vaerft in Denmark for a client in Hong Kong is this 44.4m yacht by Diana Yacht Design, due for delivery late this year. She has a steel hull, aluminium superstructure and elegant classic lines, and is being built to Lloyd's and MCA to fall beneath the critical 500 gross tonne safety limit. Her accommodation will cater for the owner, eight guests, the ship's captain and a crew of eight, and the interior panelling will be American cherrywood with a satin finish. Special features will include a cinema and a jet-stream swimming pool on the main deck. Caterpillar 3058b diesels are expected to give her a top speed of 14 knots and a range at 12 knots of 3,200 miles.
